

# QUEEN CITY AND CORA AVENUES

Anticipated Construction: Fall 2014 - Fall 2015

**Project Description:** Stormwater will be separated from a combined sewer that runs behind Judson Care Center and will be redirected aboveground to a restored streambed. Three low-lying areas (see blue areas) will be enhanced to slow and hold stormwater. New stormwater sewers will be installed along Fenton Avenue and at bottom of ravine.

# QUEBEC HEIGHTS

Anticipated Construction: Fall 2014 - Fall 2015

**Project Description:** Stormwater will be separated from a combined sewer that runs through Glenway Woods Park and will be redirected aboveground to a restored streambed. An existing low-lying area (see blue area) will be enhanced to slow and hold stormwater. New stormwater sewers will be installed along Ridlen, Wessels, Carson, and Drott avenues.
